

CYLINDER SENSORS

... the new generation!

IPF ELECTRONIC

ipf electronic presents the compact cylinder sensors **MZA70176**, **MZA70126** and **MZA70156** for querying the piston rod position of pneumatic cylinders with T-groove.

ADVANTAGES AND HIGHLIGHTS

- / Suitable for T-groove cylinder
- / Extremely robust due to metal housings
- / Short housing length (2 sensors in one groove with compact cylinders possible)
- / Insertable from above
- / Easy mounting, easy adjustment
- / Precise due to high switching accuracy with a small hysteresis
- / Short travel paths
- / High temperature resistancy up to +130°C (MZA70156)
- / Wear-free and thus very durable
- / Impact and vibration proof
- / Short-circuit and reverse polarity protected
- / High degree of protection IP67
